

Dear Parents,

Our school uses the communication system called "Text a Parent". It is a system to help schools to get messages to parents in a fast and efficient manner using text messages on mobile phones. The benefits of this system are obvious. It can be used to remind parents of upcoming school events or to quickly notify them of unforeseen changes to plan.

We use this system in the interest of better communication. It will not replace the usual letters that we send to you as they contain lots of information which cannot be abbreviated.

To operate this system we need your up-to-date mobile phone number. We will not share these numbers with any third party for any reason. If you do not have a mobile phone, perhaps you could give the number of a family member or friend who would pass on the message to you, if you so wish.

Please complete the form below if you wish to be contacted in this way.

Thank you for your co-operation.

Yours Sincerely,

Angela White.
